

Proof = container to container networking = localhost
pod to pod communication - same namespace
pod to pod communication - different namespace
Network Policies
Internal Load Balancer - Cluster IP
External Load Balancer - Load Balancer type/Node Port
Ingress Controllers

How Networking Works in Kubernetes?

Same Namespace

Different Namespace

har pod ko ip milta hai... vo same me ho ya different me... koi bhi pod kisi bhi namespace ka ho... kisi bhi dusre pod ki ip ko hit mar sakta hai...
