Coding kaise hoti hai?

Language - C++,
Java, Python,
PowerShell

Ek file banate haii..
aur uske andar line
by line likhte jate hai

Terraform -
HCL Language

Isme jo coding hoti
hai vo blocks ke
format me hoti hai...

BLOCK = {}

BLOCK =
{
kuch kuch
kuch kuch
}

BLOCK KI BAHUT VALUE HAI

Terraform Block

RequiredProvider
Block

Provider Block

Features Block

Resource Block

JAB BHI FILE BANAENGE .tf extension ka banaenge

Sab code blocks me likhenge

Sab code registry se laenge... apna dimag lgaenge hi
nahi

Sabse pehle provider ka code laenge...

Provider ka version upgrade karne ka tarika

Lock file delete kardo

terraform init -upgrade
command chala do

Terraform me google karne ka naya tarika

Google Search Term:
azurerm resource_group terraform
azurerm virtual machine terraform
azurerm application gateway terraform
azurerm frontdoor terraform
azurerm aks terraform

azurerm <RESOURCE_NAME> terraform

Bhabhiji aur sabse bada dushman saath me...
