

Very Important Points from Alok Ji -
1. Mock Partner
2. Weak topic pr more focus
3. English ho ya hindi samjhana aana chahiye bdia se...

Azure Hosted Customer Owned

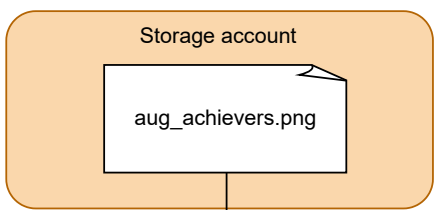

Microsoft Managed Key

Customer Managed Key

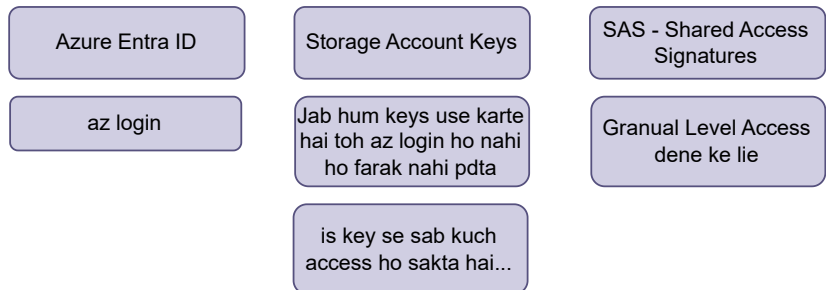

Key Rotation

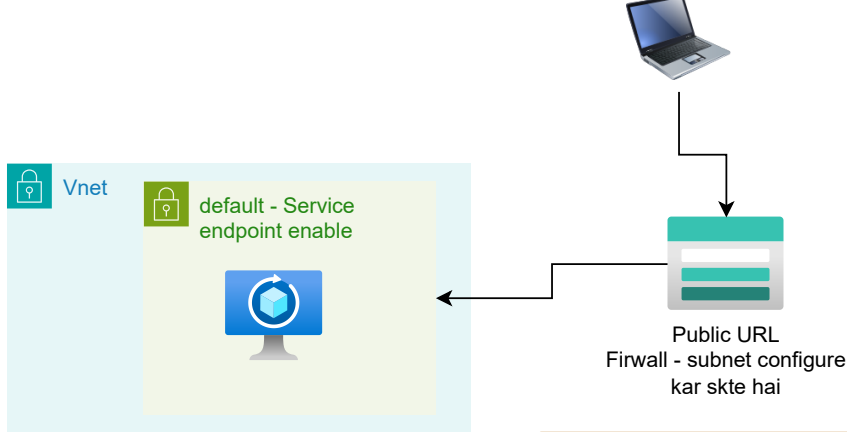

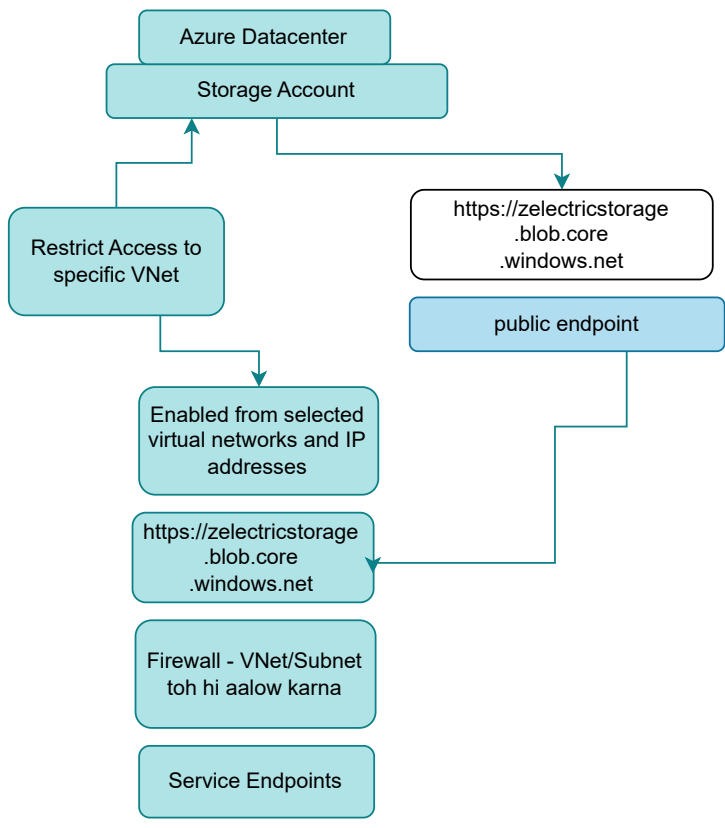

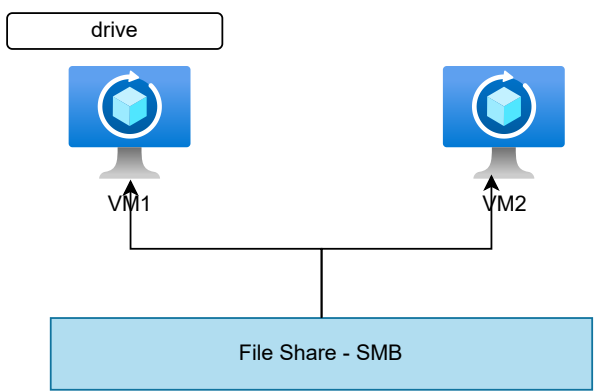

There are two types of encryptions keys in azure - One is MMK and CMK. CMK is more secure. For using CMK, A new key is created and stored in key vault and the storage account is given access to the key stored in the key vault using managed identities.
