

CMD ENTRYPOINT KARTA KYA HAI?

Jab docker container start hota hai... Image ko lekr docker run karte hai jb container start hota hai...

Assignment - EK hi docker file me CMD aur ENTRYPOINT ko kaise use karenge?

CMD Vs ENTRYPOINT

ADD Vs COPY - HomeWork

ARG vs ENV - HomeWork

Docker Networking

Docker Volume - HomeWork

MultiStage Dockerfile

Dockerfile Best Practices

1. MultiStage Dockerfile = 1.46 GB -> 195 MB

2. Try to use small base images.

alpine base images

distroless base image

195 MB -> 87 MB
