Azure?

How to create a

Requirement = How to run a nginx on Kubernetes? **Pre-Requisites** 1. Create a K8s Cluster using any one way. 2. kubecti CLI daina pdega

ek nginx ka pod

chala do na babu..

ek pod bana na bhai

kubectl run nginx-pod --image=nginx --port=80

Jo bhi communication hoga... vo api-server ke through hoga...

> pod ko IP dega

> > 4 VM banao aur khud se pura

setup karlo = Bare
