**Date - 26-01-2025**

**excel sheet**

| rg_name | rg_location |
|---|---|
| rg-devopsinsiders | westeurope |

Script → .tfvars

```
rgs = {
        rg1 ={
                rg_name = ""
                rg_location = ""
        }
}
```

PowerShell Variable

- Primitive
  - Integer
  - String
  - Boolean
- Advanced
  - Array
  - Queue
  - Hashtable

Array banate kaise hai?

Is Array pr Loop kaise lagae?

HW = Maan lo... Aapke azure account me 5 storage account hai... Alag alag location me hai...
Requirement ye hai ki hame pata lga na hai ki kaun kaun se storage account centralindia region me hai aur unki ek excel sheet bna ke bhjna hai..
