Container 1
nginx-
welcome to nginx

| custom image |
|---|
| 1. Ek naya temporary container banao base image use karke... |
| 1. Is container ke andar jana padega... docker exec karke |
| 1. Contaienr ke andar jo bhi kaam karna hai.. vo karna pdega |
| 1. container se bahar nikl na pdega |
| container se image bana lenge docker commit |

```
┌────────────────────────┐
│  nginx                 │
│  ┌──────────────────┐  │
│  │   apna kaam      │  │
│  └──────────────────┘  │
└────────────────────────┘
```

Requirement - Create custom image of starbucks(Application)

Starbucks

```
┌─────────────────────────────┐
│  nginx                      │
│  /usr/share/nginx/html      │
│  git                        │
└─────────────────────────────┘
```
faitu_container

Prerequisites
1. Docker install hona chahiye
2. ek container jime nginx hoga with koi base os(ubuntu/debian)
3. Git install kara and git clone kara application ko
4. cp command use karenge

```
docker cp lavkush_container:. /usr/share/nginx/html

docker cp . lavkush_container:/usr/share/nginx/html
```

```
┌──────────────────┐
│ FROM nginx       │
├──────────────────┤
│ COPY             │
└──────────────────┘
```

```
┌─────────────────────────────┐
│                             │
│                             │
│         nginx               │
│         debian              │
└─────────────────────────────┘
```

Assignment - Ubuntu ka base image lena hai usme terraform dalna hai...
